

ERLJOHN FRITZ D. FAMITANICO

09817469650 | mr.erljohnfamitanico@gmail.com | https://erljohnfritz.vercel.app | 591 Caloocan Norte, Binmaley, Pangasinan, Philippines 2417

SUMMARY

Computer Engineering graduate with hands-on experience in IT support, embedded systems, electronics, programming, and multimedia design. Skilled in troubleshooting hardware and software, developing microcontroller-based projects, networking, and creating digital content using various technical and creative tools. A detail-oriented and adaptable individual with strong problem-solving skills, eager to apply technical knowledge and continue developing professionally in a dynamic work environment.

WORK EXPERIENCE

Intern| Hytec Inc.

240 hours

- Provided basic IT support and troubleshooting.
- Assisted with network setup and LAN cable crimping.
- Monitored CCTV systems and equipment.
- Created graphics and edited videos.
- Managed Excel reports and e-commerce data.

Technical Project Developer

Self-Employed | 2023-2026

- Developed and assembled electronics, computer, and engineering-related projects.
- Performed hardware troubleshooting, component integration, and system testing.
- Assisted clients in developing and completing technical and academic projects.

Freelance Multimedia Creator

Self-Employed | 2025-Present

- Captured high-quality photos and videos for various events, projects, and clients.
- Performed photo and video editing, including color correction, transitions, and audio enhancement.
- Collaborated with clients to understand their creative needs and deliver polished visual content.

CERTIFICATIONS

Basic Occupation Safety and Health Training (BOSH)

EDUCATION

Bachelor of Science in Computer Engineering

2022 - 2026

Universidad De Dagupan

REFERENCE

Engr. Djhoana Lou Salve N. Tigno

Instructor | Universidad De Dagupan

Phone: 09070384018

Email: djhoanatigno.faculty@cdd.edu.ph

Engr. Sean Gabriel A. Macapagal

Instructor | Universidad De Dagupan

Email: macapagals@cdd.edu.ph

TECHNICAL SKILLS

- Computer Hardware & Software • Technical Troubleshooting • Programming • Embedded Systems • Electronics • System Maintenance • Multimedia Design • Video Editing • Graphic Design • Technical Documentation

PROJECTS

PEDRIX – AI-Assisted Energy Harvesting System

Universidad de Dagupan · 2025–2026

• Developed an electromagnetic induction system for sustainable energy harvesting with AI-assisted monitoring.

ESP32 Environmental Monitoring System

Universidad de Dagupan · 2025–2026

• Developed a real-time temperature, humidity, and motion monitoring dashboard.

Autonomous Bin Collection Robot

Universidad de Dagupan · 2025–2026

• Built a robot integrating object detection, sensors, motors, and autonomous navigation.

Quadruped Spider Robot

Universidad de Dagupan · 2025–2026

• Developed an ESP32-controlled four-legged robot using servo-based movement.

Reaction Catch Stick – Arcade Game

Universidad de Dagupan · 2024–2025

• Developed an interactive arcade game designed to test player reaction speed using electronic controls and sensors.

Wall Following Robot

Universidad de Dagupan · 2023–2024

• Developed an autonomous robot that navigates and follows walls using distance sensors.

Light Following Robot

Universidad de Dagupan · 2023–2024

• Built an autonomous robot that follows light using only transistors and LDR sensors.

ADITIONAL INFORMATION

Vice President for Information

Computer Engineering Student Organization · 2024–2026

• Served as Vice President for Information for two years, supporting organizational communications and information management.

DOST ROBOTECH Cup 2026

Participant · 2026

• Participated in the DOST ROBOTECH Cup 2026 robotics competition.
